

# AROSHA KALUARAC HCHI

Senior Network  
Engineer | Chief  
Technology Officer |  
AI & Automation Lead

## Contact

**Address**  
Oakleigh South 3167

**Phone**  
0427501917

**E-mail**  
aroshak@gmail.com

## Highlights

- Technical Leadership & Strategy
- End-to-end product architecture and delivery
- AI/ML implementation and scaling strategies
- Cloud infrastructure design (GCP, AWS, Azure)
- Enterprise network architecture and security

Technology leader with 15+ years driving end-to-end product delivery and building high-performing engineering teams. Successfully architected and scaled AI-powered platforms serving real customers while maintaining deep hands-on technical expertise. Proven track record of translating business vision into executable technical roadmaps, with particular strength in automation solutions that eliminate repetitive business processes.

## Experience

2023-08 -  
Current

### Senior Network Engineer

*Civica Pty Ltd, Melbourne*

- Drive enterprise-scale infrastructure strategy and automation initiatives for critical business systems.
- Design and manage enterprise Cisco datacenter networks with Next Gen Firewalls and Load Balancers
- Lead cloud migration strategies across multi-cloud environments (GCP, AWS, Azure)
- DevOps with Terraform, Annabel, IaC (Infrastructure as Code). CI/CD with Git Actions. AI Automation with MCP.
- Docker, Kubernetes
- Implement automation frameworks for network management and monitoring
- Oversee ISP network operations and optimization strategies

2023-01 -  
Current

### Technical Co-Founder & Product Leader

*Independent AI Developer & Entrepreneur*

- Led complete product development lifecycle for multiple AI-powered applications serving real customers in production environments.
- ROONG E-Commerce Platform: Single-handedly architected and deployed comprehensive online supermarket platform with AI-powered features, generating real revenue and serving active customers
- Product Portfolio: Built 5+ AI-driven applications using cutting-edge tools including OpenAI GPT-4, Claude, Gemini AI Studio, and advanced RAG implementations
- Technical Innovation: Implemented modern AI workflows including vector databases (Supabase,

- Product-market fit validation and optimization
- Customer-driven technical roadmap development
- Revenue generation through technical innovation
- Market analysis and competitive positioning
- Engineering team recruitment and mentoring
- Agile development methodologies and CI/CD pipelines
- Cross-functional collaboration (engineering, product, business)
- Startup and scale-up operational experience
- Business process automation and optimization
- Intelligent workflow orchestration with LangGraph
- Customer service automation using RAG implementations
- Performance monitoring and analytics automation
- OpenAI GPT-4
- Google Gemini AI Studio
- Anthropic Claude

2022-05 -  
2023-02

- Pinecone), automated customer service agents, and intelligent business process automation
- Market Validation: Achieved successful product-market fit with measurable customer engagement and revenue generation
- Technical Stack: Next.js 15, TypeScript, Supabase, GCP Cloud Run, LangGraph, OpenAI/Anthropic APIs, Advanced Analytics (GA4, GTM)

## Senior Network Engineer

*Tecala Group, Sydney*

- Led technical solution delivery for multiple enterprise clients in managed service provider environment.
- Configured and maintained complex LAN/WAN infrastructure for diverse client base
- Managed enterprise technologies including Juniper, NSX-T, Fortinet, Palo Alto, F5 Load Balancers with CGNAT
- Conducted comprehensive security audits across multiple firewall platforms
- Built automated documentation and training systems for team efficiency
- Streamlined project delivery through enhanced team management and task prioritization

2017-11 -  
2022-07

## Network Engineer / Specialist

*Bendigo Telco*

- Led major infrastructure modernization projects and innovative customer solution development.
- Infrastructure Refresh Program: Led comprehensive transformation of 10+ POPs nationwide, migrating from legacy systems to modern ASR 9000, NCS5500, NX9K platforms
- SDWAN Implementation: Technical lead for Viptela SDWAN evaluation and deployment for Bendigo Bank, including comprehensive POC with DIA, MPLS integration
- Subscriber Management Innovation: Architected and implemented new subscriber management solution using Sandvine platform, securing business case funding and leading end-to-end deployment
- Technical Innovations: Designed custom L2 Xconnect failover solutions for critical

- Deepseek
- LangGraph workflow orchestration
- RAG implementations
- Vector databases (Supabase Vector, Pinecone)
- Automated code generation and intelligent debugging
- Frontend: Next.js
- React
- TypeScript
- Tailwind CSS
- Backend: Node.js
- Supabase
- Firebase
- PostgreSQL
- APIs: RESTful services
- GraphQL
- real-time subscriptions
- Authentication: Clerk
- Supabase Auth
- enterprise-grade security
- Multi-cloud deployment (GCP Cloud Run/Functions, AWS, Azure)
- Enterprise networking (Cisco datacenter, ISP operations)

2017-04 -  
2017-11

- infrastructure clients
- Implemented 4G to 4G BGP failover for energy sector requirements
- Developed EVPN solution from concept to production-ready in under 3 days

## Network Capacity Planner

*Telstra, Melbourne*

- Led capacity planning and deployment strategies for Telstra's national infrastructure to support 3-5 year growth forecasts.
- Forecast network expansions, cache requirements (Google, Netflix, Akamai) and bandwidth trends
- Collaborate directly with major vendors (Cisco, Juniper, Google, Netflix, Akamai) for strategic planning
- Evaluate CAPEX/OPEX optimization through advanced network monitoring and forecasting tools
- Develop deployment standards and lifecycle management for infrastructure platforms

2012-10 -  
2017-01

## Network Engineer

*Exetel Pty Ltd, Sydney*

- Delivered enterprise networking solutions for major corporate clients while managing core ISP network infrastructure.
- Configured CISCO ISR 7200/2800 Series, Catalyst 3500/6500 Series, Nexus 7000, ASR 9000 platforms
- Implemented large-scale MPLS-VPN solutions for enterprise clients including Melbourne Airport, Coca-Cola, Anytime Fitness
- Advanced BGP, MPLS, ACL configuration and policy-based routing optimization
- Managed network monitoring systems (MRTG, PRTG, Nagios, Observium) for corporate and ISP trunk links
- Major Client Solutions: Melbourne Airport: QoS-optimized dedicated connections for VOIP traffic, Coca-Cola: Secure VPN connectivity to US operations, Seventh Day Adventist: Large-scale MPLS-VPN network across multiple sites

2010-12 -

## Field Network Engineer

- Security infrastructure (Next Gen Firewalls, Load Balancers)
- CI/CD pipelines and automated deployment strategies
- Workflow automation and optimization
- Customer service automation with AI agents
- Analytics and performance monitoring automation
- Marketing intelligence and A/B testing frameworks
- Proven Revenue Generation
- Full-Stack Leadership
- Rapid Innovation Capability
- Infrastructure at Scale
- Customer-Centric Approach

## Websites, Portfolios, Profiles

- [www.roong.lk](http://www.roong.lk)

2012-07

NSC Global Pvt Ltd, London

- Provided end-to-end network support for RBS (Royal Bank of Scotland) and NATWEST banking networks.
- Led VOIP migration projects replacing legacy telephone systems
- Site surveys and commissioning/decommissioning of enterprise IP equipment
- Collaborated with AT&T for centralized network control operations
- Cisco device configuration including OSPF, EIGRP routing protocols, VLANs, and Wi-Fi networks (Aruba, Cisco, Linksys)

2007-06 -  
2008-06

## Trainee Telecommunication Technical Officer

Suntel Pvt Ltd, Colombo

- Gained foundational experience in telecommunications infrastructure and wireless network deployment.
- Technical Focus: CDMA access networks (Alcatel, Huawei), AIRSPAN WipLL systems
- SDH/PDH transmission systems with Ericsson MiniLink-E radio and MUX
- Microwave link planning and survey using Path Loss software
- WiMAX implementation and testing with Alvarion Walkair systems

## Education

2008-01

## Bachelor of Science: Mobile Telecommunication Technologies

Northumbria University - Newcastle Upon Tyne, UK

2015-01

## CCNP - Cisco Certified Network Professional

Cisco Systems

## Key Leadership Achievements

- Built and deployed 5+ production AI applications from concept to market

- Led infrastructure transformations across enterprise and ISP environments
- Successfully monetized technical innovations through www.roong.lk e-commerce platform
- Managed complete product lifecycles with cross-functional teams

---

## Core Competencies

---

End-to-end product architecture and delivery, AI/ML implementation and scaling strategies, Cloud infrastructure design (GCP, AWS, Azure), Enterprise network architecture and security, Product-market fit validation and optimization, Customer-driven technical roadmap development, Revenue generation through technical innovation, Market analysis and competitive positioning, Engineering team recruitment and mentoring, Agile development methodologies and CI/CD pipelines, Cross-functional collaboration (engineering, product, business), Startup and scale-up operational experience, Business process automation and optimization, Intelligent workflow orchestration with LangGraph, Customer service automation using RAG implementations, Performance monitoring and analytics automation

---

## Education Certifications

---

- Master of Science, Mobile Telecommunication Technologies, 2008, Northumbria University, Newcastle Upon Tyne
- CCNP - Cisco Certified Network Professional, 2015, Cisco Systems
- Advanced AI/ML frameworks and development tools, Cloud architecture certifications (GCP, AWS, Azure), Modern development methodologies and automation frameworks

---

## Technical Expertise

---

OpenAI GPT-4, Google Gemini AI Studio, Anthropic Claude, Deepseek, LangGraph workflow

orchestration, RAG implementations, Vector databases (Supabase Vector, Pinecone), Automated code generation and intelligent debugging, Frontend: Next.js, React, TypeScript, Tailwind CSS, Backend: Node.js, Supabase, Firebase, PostgreSQL, APIs: RESTful services, GraphQL, real-time subscriptions, Authentication: Clerk, Supabase Auth, enterprise-grade security, Multi-cloud deployment (GCP Cloud Run/Functions, AWS, Azure), Enterprise networking (Cisco datacenter, ISP operations), Security infrastructure (Next Gen Firewalls, Load Balancers), CI/CD pipelines and automated deployment strategies, Workflow automation and optimization, Customer service automation with AI agents, Analytics and performance monitoring automation, Marketing intelligence and A/B testing frameworks

---

## Key Differentiators

---

- Proven Revenue Generation: Successfully monetized technical innovations through real-world applications with paying customers
- Full-Stack Leadership: Unique combination of deep technical expertise and business acumen, capable of bridging technology and market needs
- Rapid Innovation Capability: Demonstrated ability to quickly adopt emerging technologies and translate them into business value
- Infrastructure at Scale: Extensive experience managing enterprise-grade infrastructure supporting critical business operations
- Customer-Centric Approach: Strong focus on solving real business problems through technical innovation and automation
